

CONCRETE PULVERIZER

Equipped with interchangeable teeth designed to offer durability and increased crushing power, the concrete pulverizer is designed for smashing and pulverizing several types of concrete.

Our concrete pulverizers are made of heavy-duty steel (150,000 PSI), have teeth made of Hardox 500, and offer much more resistance to wear than standard steel. We offer exclusive interchangeable quick disconnectors that are compatible with all of our standard products.

**Stronger Jaw Than
the Standard Pin-On.**

**Mounted on a Bolt-on Quick
Hitch "Top Plate" That Is
Interchangeable.**

**Fastest Execution System and
the Biggest Strength Ratio on
the Market.**

Interchangeable Top Plate
